IBM Office Connect
Version 4.0

About This Sheet

This sheet provides information you need before you install IBM Office Connect.

What You Should Read

The IBM Office Connect installation program installs Office Connect. If you have questions about system requirements or need more information on how to install Office Connect, see the installation notes (**install.htm**) that come with Office Connect.

After you have installed Office Connect, you can access the following documentation from the IBM Office Connect program group of the Windows **Start** menu:

- Online general help (background topics and procedures)
- A tutorial to help you get started using Office Connect
- Other documentation, including:
 - Release notes
 - Installation Notes

You can also access the online help and tutorial from the Office Connect Project Manager and the Microsoft Excel **Help** menu, and you can access context-sensitive help directly from Office Connect.
